Professional Summary

D3 IT graduate (GPA 3.26, Institut Teknologi Del) with production experience across mobile (React Native, Flutter), backend (Node.js/Express, Laravel, Golang), and cloud (EC2, NevaCloud VPS). Final year project: skin disease classifier with ConvNeXt Tiny, 92% accuracy. Targeting **Software Developer** (Fullstack / Mobile) and **QA / Tester** roles.

Technical Skills

Languages	TypeScript, JavaScript, Dart, PHP, Golang, Python, SQL
Mobile	React Native 0.74 (TypeScript), Flutter (Dart)
Frontend	React.js, Next.js, Vite + React, Laravel Inertia
Backend	Node.js 20 + Express (TypeScript), Laravel (PHP), Golang REST API
Databases	PostgreSQL 16, MySQL, Firebase Firestore
DevOps / Cloud	Docker, Docker Compose, MinIO, Amazon EC2, NevaCloud VPS, Linux (SSH, Security Groups)
ML / AI	PyTorch, ConvNeXt Tiny, Roboflow (dataset annotation)
Testing / Tools	Postman (API testing), Git, GitHub, WebSocket

Experience

Flashcom Indonesia **Mar 2026 – Aug 2026**
Mobile & Fullstack Developer Intern *Medan, Sumatera Utara*

- Built the **SIAP** mobile attendance app with **React Native 0.74 (TypeScript)**: GPS-validated selfie check-in, anti-fake-GPS/root detection, and offline mode with auto-sync.
- Implemented real-time tracking via **WebSocket** between the mobile client and **Node.js 20 + Express** backend; **PostgreSQL 16** for primary data store, **MinIO** for photo/PDF storage on NevaCloud VPS.
- Conducted **API testing with Postman** across all REST endpoints: attendance submission, report generation, and BAST PDF auto-generation flows.

PDAM Tirtanadi Medan **Jan 2026 – Mar 2026**
Software Engineer Intern *Medan, Sumatera Utara*

- Developed an internal web-based monitoring and reporting system to track operational data across departments, improving visibility into daily workflows.
- Implemented data input and report generation features, enabling management to generate structured operational reports and monitor key metrics in real time.

Projects

SIAP: Attendance & Reporting System *(Internship @ Flashcom Indonesia)* *Mar 2026 – Aug 2026*
React Native 0.74 (TS) • Vite + React (TS) • Node.js 20 + Express (TS) • PostgreSQL 16 • MinIO • WebSocket • NevaCloud VPS

- Developed cross-platform mobile app (Android/iOS) for 3 user divisions (Security, Customer Service, Utility) with selfie + GPS attendance, anti-fake-GPS/root detection, and offline auto-sync.
- Built a real-time web admin dashboard (Vite + React) with live tracking, report approval, incident reporting with photo watermarks, and HR/Payroll CSV export.
- Automated digital handovers with auto-generated BAST PDFs; all media stored in MinIO object storage on NevaCloud VPS.

Facial Skin Disease Classification System *(Tugas Akhir / Final Year Project)* *Aug 2025 – Jan 2026*
Flutter (Dart) • Golang REST API • PyTorch • ConvNeXt Tiny • Roboflow

- Trained a **ConvNeXt Tiny** model (PyTorch) on a **4,000-image** dataset annotated with **Roboflow**, achieving **92% classification accuracy**.
- Integrated the trained model into a **Golang REST API** for real-time inference, consumed by a cross-platform **Flutter** mobile app (Android/iOS).
- Delivered end-to-end ML-to-mobile pipeline: Roboflow annotation, PyTorch training, Golang inference API, Flutter UI.

PUSMASIB: Community Health Center Mobile App *(Fullstack Developer)* *Jan 2025 – Jun 2025*
Flutter (Dart) • Laravel REST API (PHP) • Firebase Firestore • Firebase Authentication

- Built a cross-platform mobile app (Android/iOS) for Siborongborong Health Center: online visit registration, real-time queue notifications, and patient medical history.
- Developed a **Laravel (PHP) REST API** backend; integrated **Firebase Firestore** for real-time data sync and **Firebase Authentication** for secure user access.

PT Aoki Mori Indonesia: Company Website & Student Registration System *(Live: lpkmoricentre.co.id)* *Nov 2025 – Dec 2025*
Laravel Inertia • ReactJS • PostgreSQL • Docker Compose

- Developed a company profile website integrated with an online student registration system and multilingual support (Japanese, English, Indonesian).

- Containerized application services using **Docker Compose** and delivered responsive UI aligned with institutional branding.
- Designed a **PostgreSQL** relational database for student records, course data, and admin reporting; deployed live at lpkmoricentre.co.id.

KicksNStyle: E-Commerce Shoe Sales App *(Fullstack Developer)* *Nov 2024 – Dec 2024*

Flutter (Dart) • Laravel REST API • Firebase Firestore • Firebase Authentication

Built a full-stack mobile e-commerce app (Android/iOS) with **Flutter** frontend, **Laravel REST API** backend, and **Firebase** for data storage and user authentication.

Leadership & Organization

Vice Chairman, HIMATIF, Institut Teknologi Del **Aug 2024 – Dec 2025**

Himpunan Mahasiswa Teknologi Informasi *Laguboti, Sumatera Utara*

- Led organizational operations alongside the Chair, implementing work programs to develop technical and professional skills for IT students.
- Bridged communication between students and faculty, supporting non-academic curriculum development across departments.

Deputy Chairman, Student Cadre Development Event, HIMATIF **Sep 2024**

Institut Teknologi Del

- Oversaw execution of cadre development event, coordinating all committee divisions to deliver program objectives on schedule.

Education

Institut Teknologi Del **Aug 2023 – Aug 2026**

D3 (Associate Degree) in Information Technology | *GPA:* ***3.26 / 4.00*** *Laguboti, Sumatera Utara*

Certifications & Achievements

2025 TOEFL ITP: Score **500 / 677**
2025 Full Stack Application Development Capstone Project
2025 Full Stack Software Developer Assessment
2025 Developing Front-End Apps with React
2025 Software Quality Assurance and Testing *(Webinar)*
